Science & Engineering Fair Topic--Research Name _____

Proposed Topic for Science & Engineering Fair: _____

Question that you will test: _____

While starting your project, you need to research your topic to see what information is already published, what experiments have already been done on your topic, and what questions others are asking about the topic. You don't want to do an experiment that has already been done with published results. Below, list at least 4 websites you found that have information on your topic. Explain what you have learned about your topic from these websites.

Website #1: _____

Information gathered: _____

Website #2: _____

Information gathered: _____

Website #3: _____

Information gathered: _____

Website #4: _____

Information gathered: _____

Remember to consider the question you want to ask in your experiment.

Do you need to change your question based on the research you have found? Why or why not?
