

Name _____ Topic: _____

Question: _____

Science & Engineering Fair Planning Form

Time:

*Will the investigation or design building take more than the time allotted between now and December 7?

*When do I need to start with the experimental process in order to have all data recorded in enough time?

*What is the plan for completing the experiment or the design process? Describe the timeline.

Materials:

*What materials are required? What will these items cost? Where will I get these items?

Safety:

*What tools or other scientific supplies do I need for my project? Where will I get these tools? Are they tools I have at home or at school?

*Will I need adult supervision for any part of the project? When will I have the adult assist?

*Are any of the supplies items that someone could be allergic to?

Animal Subjects:

*Does my topic require me to work with animals? If so, who will I test/work with?

*What documentation do I need to have completed before I begin my experiment?

*How will I ensure my test subjects are kept safe?

Research:

*Is my topic one that I already have background knowledge in? If so, what information do I already know?

*What information do I need to research in order to understand the science within the experiment or engineering design?

*Where do I plan to get the research from?

Student Signature: _____ Date _____

Parent Signature: _____ Date _____

Teacher Approval: _____ Date _____
